

Emus are found in Australia. They are unusual birds. They don't use twitter. According to some fools, these birds make tick-toks, and have started a new trend called 'Emu Memu', Scientists are still discovering about this new trend. These birds can't fly: they walk and run. as fas as 50 kmph (IDK if thats true), with a 3m running stride! They belong to a group of flightless birds called Ratties.
